## PROCEDURE

1. Measure and heat Phase A to 75-80°C with vortex mixing.
2. Heat and mix Phase B to 75-80°C until all is melted. At 75-80°C, add Phase B to Phase A under homogenizing until well blended. Start cooling.
3. At 40-45°C, add Phase C to batch while cooling batch to 25-30°C.
