PROCEDURE

1. While heating Water to 70-75°C, add Dermofeel and Aloe Vera to Water until all is dissolved. Sprinkle Ultrez-10 with moderate mixing and make sure Ultrez is dispersed, then add the remaining ingredients of Phase A to batch.
2. Heat Phase B with slow mixing to 70-75°C until all is melted.
3. When both phases at 70-75°C, add Phase B to Phase A and mix well until uniform. Start cooling.
4. At 35-40°C, add Phase C and pre-blended Phase D to batch with continued mixing while cooling to 25-30°C.
