PROCEDURE

1. Add Phase A in order listed.
2. Premix Phase B, add to Phase A.
3. Add Phase C into Phase A/B. Heat Phase A/B/C to 75-80°C.
4. Premix Phase D to 75-80°C. At 75-80°C, Add Phase D into Phase A/B/C. Cool and slowly mix to 35-40°C.
5. Add Phase E, adjusting pH to target 5.00-5.50.
6. Then add Phase F in order listed.
