## PROCEDURE

1. Add Phase A in order listed, mixing until clear heat to 50°C. Then, premix Phase B, add to Phase A.
2. Add Phase C in order listed.
3. Premix Phase D, then add to Phase A/B/C.
4. Add Phase E in order listed, mixing slowly.
5. Adjust viscosity with Phase F as needed to thicken. Ensure pH is target 5.00-6.00.
